

The ultimate combination of mobility & quality for pipe coatings

Key facts:

- Anti-corrosion and flow assurance coatings
- Same quality and output as the most advanced fixed plants
- 6-week mobilization
- 4-week demobilization
- Outside diameter range of 8-42 inches
- Incorporates leading HSE systems

Brigden™ is our new modular mobile plant with the ability to manufacture a full range of anti-corrosion and flow assurance pipe coatings. Raw materials storage, maintenance, quality control and testing facilities are all fully integrated.

This mobile facility can be located in-country, near a pipe mill or close to an oil and gas field to streamline project logistics, improve safety and reduce costs of handling and transporting pipe.

Brigden ships in standard ISO containers and takes only six weeks to assemble and be fully operational. So it can be ready wherever and whenever you are.
