

BREDERO SHAW

A SHAWCOR COMPANY

the
**GLOBAL
LEADER**
in pipe coating solutions.

Camrose II, Camrose, Alberta

PLANT CAPABILITIES SHEET

FEATURES AND BENEFITS

Camrose II, Shaw Pipe's newest coating facility will provide Western Canadian customers with high levels of quality and service with added capacity and the capability to produce Insul-8® Systems including Insul-8® HT, Fusion Bond Epoxy, and Yellow Jacket®. In addition, the new facility will manufacture Insul-8® AG, a new high temperature pipe insulation system for above ground pipelines.

Shaw Pipe's "Coating Solution Centre" will also provide advanced SureFlo® internal flow efficiency, anti-corrosion and abrasion resistant pipe coatings for the Oil Sands region and other pipeline markets.

Camrose II sits on a 130 acre site and is adjacent to another 250 acres of land which allows for increased pipe storage capacity and future expansion in order to meet the requirements of both small and large diameter projects. The facility is located next to Evraz Inc. NA, which reduces logistical and management interface costs. With minimal pipe handling, damage to bare or coated pipe is reduced and repair costs are minimized.

A new rail spur was constructed at Camrose II, doubling the facility's transportation capacity, as well, double jointing services are offered at Camrose II.

Anti-Corrosion Coatings

Flow Assurance Coatings

Internal Coatings

MANUFACTURED PRODUCTS

COATING TYPE	DIAMETER mm (")		LENGTH m (')	
	MIN.	MAX.	MIN.	MAX.
FBE: Fusion Bonded Epoxy Powder Coating	89 (3.5)	1220 (48)	5.5 (18)	25 (82)
Dual Layer FBE: Dual Layer Fusion Bonded Epoxy Powder Coating	89 (3.5)	1220 (48)	5.5 (18)	25 (82)
Yellow Jacket®: High Density Two Layer Polyethylene Coating	12 (0.5)	610 (24)	4.9 (16)	19.8 (65)
Insul-8®: Moulded or Spray Applied PU Foam Insulation	89 (3.5)	914 (36)	5.5 (18)	25 (82)
Insul-8® AG: Pre-insulated pipe insulation system for above ground	152 (6)	1524 (60)	5.5 (18)	25 (82)
Insul-8® HT: Spray Applied PE Foam Insulation for High Temperatures	89 (3.5)	610 (24)	6.1 (20)	19.8 (65)
SureFlo® FEC: Thin Film Internal Epoxy Coating	89 (3.5)	1220 (48)	5.5 (18)	25 (82)

HEALTH & SAFETY

Bredero Shaw is committed to providing a safe and healthy workplace and ensuring that our business activities are conducted in a manner that protects the environment. It is our objective to achieve an Incident and Injury Free workplace, where everyone recognizes that by risking incident or injury, they are putting in jeopardy what they value and those they care for.

BREDERO SHAW: THE GLOBAL LEADER IN PIPE COATING SOLUTIONS

Bredero Shaw is the world leader in pipe coating solutions, with more than 75 years of experience, over 27 pipe coating facilities on 6 continents and the largest team of technical and service specialists in the business. Bredero Shaw offers technologically advanced solutions for anti-corrosion coatings, protective and weight coatings, thermal flow assurance coatings, internal coatings, custom coatings and field joints for both onshore and offshore applications. This broad range of products and services provides Bredero Shaw with the unique capability to service the full spectrum of pipeline protection and flow assurance requirements. Consult your Bredero Shaw representative for your unique project requirements.

The information contained herein is indicative of the types of coatings provided by Bredero Shaw, and is not intended to be a guarantee that a particular coating will be suitable for a given application. Since many unique environmental, operating, and design conditions must be considered, the user shall determine the suitability of the coating for the intended use and assume all the risks and liabilities in connection therewith. Bredero Shaw's liability is stated in our standard conditions of sale.
