

Bredero Shaw awarded contract for 598 km West African Gas Pipeline Project

Bredero Shaw to expand pipe coating facilities at Onne Oil & Gas Free Zone in Nigeria, and mobilize facility at Tema, Ghana to supply 598 km gas line.

Bredero Shaw has signed a contract covering the supply of concrete weight coating for 598 km of pipe that will be used to build the West African Gas Pipeline (WAGP). The line pipe will be transported to a Bredero Shaw project facility that is being mobilized at Tema in Ghana, where the concrete weight coating will be applied and anodes will be installed. The pipeline will transport gas from Nigeria to Benin, Togo and Ghana where most of the gas will be used for power generation.

Bredero Shaw (Nigeria) Ltd. has played a major role in the provision of pipeline coatings for gas and oil projects in West Africa for over twenty years from facilities located in Onne and Warri, Nigeria. Due to the increasing demand for anti-corrosion and concrete weight coatings for offshore, swamp and land pipeline projects, the company is moving forward with the installation of a new Bredero Shaw coating facility to be located at the Onne Oil and Gas Free Zone in Nigeria. This facility, which is part of Bredero Shaw's overall plan to serve the growing West African market, will expand capacity for anti-corrosion and concrete weight coatings for pipeline projects in Nigeria and other nearby markets.

Project Details

Pipeline Length
598 km Offshore

Location
Nigeria, Benin, Togo & Ghana

Owner
WAPCo
(ChevronTexaco, NNPC, Shell, & Takoradi Power Company Ltd.)

Pipeline Coating
20" Concrete Weight Coating with applied anodes

Plant
Tema, Ghana

Bredero Shaw is the global leader in pipe coating solutions and employs over 4,000 personnel located at offices and facilities in fifteen countries. The division provides specialized coating systems and related services, for corrosion protection, insulation and weight coating applications, on land and marine pipelines, including highly engineered corrosion and insulation systems for deepwater applications.
